SUPERFLEX **ROOFING SYSTEM**

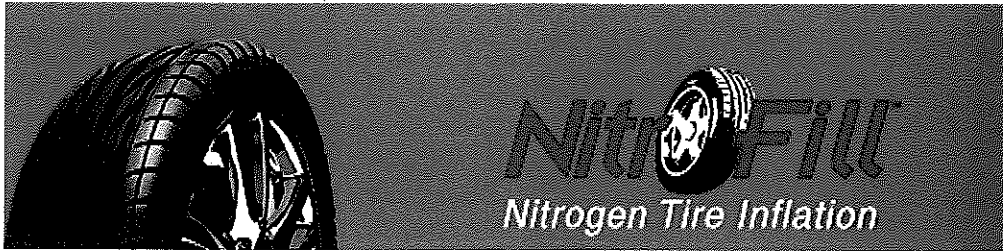

SUPERFLEX is a state-of-the-art 21st Century Thermoplastic Polyolefin RV roofing membrane for today's RV producers.

FEATURES & BENEFITS:

- ✓ ***50% Lighter Than EPDM Roofing!***
- ✓ ***Flexible For Today's Complex Roof Designs!***
- ✓ ***Excellent UV Protection!***
- ✓ ***Puncture & Tear Resistant!***
- ✓ ***Resistant To Mold, Algae, and Fungus!***
- ✓ ***Will Not Chalk Like EPDM Roofing!***
- ✓ ***Colors Available!***
- ✓ ***Textured Surface For Traction!***
- ✓ ***Easy To Repair!***
- ✓ ***12 Year Limited Warranty!***

Alpha Systems manufactures all the environmentally friendly adhesives and sealants to properly bond and seal the membrane.

Proper care, cleaning and maintenance of SUPERFLEX roofing is quite simple. Periodic cleaning is the primary maintenance needed. This can be achieved by using a common household 'non-abrasive' cleaner.

What NitroFill Will Do for You:

- *Increases tire life up to 30%*
- *Improves fuel economy*
- *Reduces the chance of tire failure up to 50%*
- *Improves braking and handling*
- *Reduces wheel corrosion*
- *Reduces running tire temperature*
- *Maintains proper tire pressure*

Nitrogen Tire Inflation by NitroFill

Nitrogen in tires is becoming a very popular replacement for air, and for good reason. With proper inflation procedures and adequate purity nitrogen can provide amazing benefits. Converting to nitrogen in tires can improve your fuel economy by up to 10% and increase your tire life by 30% or more while dramatically increasing the safety of your vehicle. High purity nitrogen has been used for decades in NASCAR, Formula One, the Tour de France, the US Military and many other applications where safety and economy are paramount concerns. Only the high cost and complexities of generating and properly administering nitrogen have kept it out of reach of the general public. Recent advances in nitrogen production technology have now made nitrogen inflation economically viable for the automotive service industry - and NitroFill has lead the way by providing a refined nitrogen product of incomparable purity. Our nitrogen generators have set the standard worldwide and are used by Fortune 500 companies, governmental organizations and military installations around the globe. In fact, NitroFill was selected, and remains, the sole nitrogen tire inflation product used in our nation's fleet of B2 bombers.

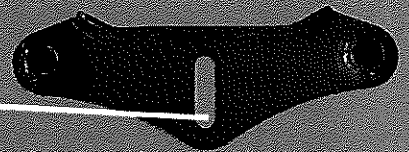

THE MORryde CRE3000

IT'S ALL ABOUT THE TRAVEL

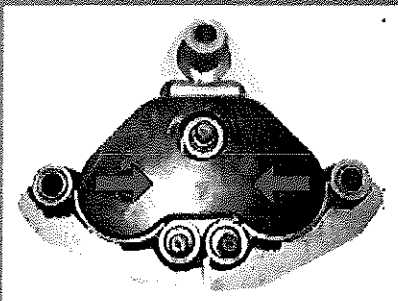

- EASY BOLT-ON INSTALLATION REPLACES EXISTING EQUALIZER
- SMOOTHER TOWING THAN CONVENTIONAL EQUALIZER
- WORKS ON AXELS RATED UP TO 8,000 LBS
- PROTECTS FROM DAMAGINS ROAD SHOCK
- UNIQUE TRAVEL SLOT ALLOWS FOR UP TO 3" OF SUSPENSION TRAVEL

**TRAVEL
SLOT**

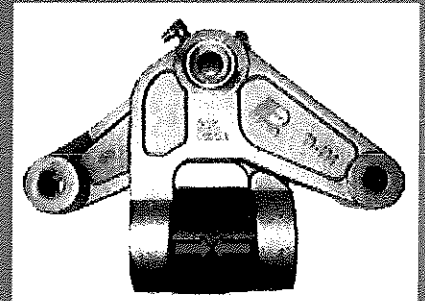

When it comes to suspension performance, **it's all about suspension travel.** Increased travel means smoother towing, improved towability and better protection from damaging road shock. The MORryde CRE3000 provides over 3" of suspension travel. At the heart of this suspension system is a compressed rubber insert along with a unique travel slot to **help your unit smoothly glide over today's rough roads.** The CRE3000 also provides **added durability** and **reduced frame stress.** It has been tested and rated for use with up to 8K axles - it is built to last!

- PROVIDES EQUALIZATION

- ROCK BACK AND FORTH

- VERY LIMITED TRAVEL

Above. Beyond. Always.
